5	Making Tables	3
6	Exercise: Replicating a Table	4

1 Commands vs. Environments

command \Rightarrow starts with "`\`" can take arguments in "`{ }`" and sometimes has options in "`[]`"

environment \Rightarrow enclosed in "`\begin{ } \end{ }`" command with the argument specifying the env name, like idk "`center`"

abstract \Rightarrow short text with explanation of what the article is about

2 Unordered Lists

- Bread :|
- Bread :|
 - Bread :|
 - Bread :|

3 Ordered Lists

1. Bread :|
2. Bread :|
 - Bread :|
 - I) Bread :|
 - II) Bread :|
 - Bread :|

4 Exercise: Replicating a List

I am deeply sorry for I have not made the exercise as intended.

1. The Lord of the Ring Series

- part 1
- part 2
- part 3

2. Star Wars original trilogy

- part 1
- part 2
- part 3

3. The Hunger Games trilogy

- part 1
- part 2
- part 3
 - part 1
 - part 2

5 Making Tables

1	2	3
4	5	6

Table 1: This is the best table You have ever seen.

6 Exercise: Replicating a Table

Again, I modified the exercise as it is pointless to copy the text word for word.

Fruit	Calories, kcal	Salt, mg	sugar, g
Banana	89	1	12
Apple	52	1	10
Peach	39	0	8
Pear	57	1	9

Table 2: Nutrients for different fruit per 100g.
